Name	HR	Date	
------	----	------	--

What does your name look like as a constellation?

Directions:

- 1. Write your name vertically down the Y axis. (Skipping a space between each letter of the name will spread the picture out better.)
- 2. Start with the first letter in the written name. Follow along that row parallel to the X axis until you come to the column with that letter of the alphabet and draw a star in that square (see example). Continue with the other letters.
- 3. Look at the stars and find a pattern. The paper may be held in any orientation, and one or several constellations could be created.
- 4. "Connect-the-dots" and draw a picture of your constellation.
